

Sweet Pointe Website Update + Social Support — 8–10 Week Build

Milestone-gated, steered against goal windows. The website work is front-loaded; social support runs through the tail so the rhythm holds after launch.

THE BUILD, AT A GLANCE

MILESTONE GATES & GOAL WINDOWS

What You Have At The End

Not a folder of recommendations. A refreshed presence your team operates.

The Output — Week 10

Everything below is live, documented, and in your team's hands — running whether or not anyone from FRDT is in the room.

- ✓ **An updated website** — refreshed design, current copy, products presented properly
- ✓ **Mobile + speed cleanup** — the site works where your buyers actually are
- ✓ **Clear paths to yes** — order, visit, and contact within a tap
- ✓ **Search infrastructure live** — GA4 + Search Console tracking, GBP cleaned, schema in place, found in Google and AI answers
- ✓ **Aligned social profiles** — Facebook + Instagram consistent with the brand
- ✓ **A template + calendar system** — batched, not improvised
- ✓ **A first run of published content** — the rhythm already moving at handoff
- ✓ **Playbook + training** — so the team can run it without FRDT

SCOPE GUARDRAILS

- **The fee covers the scoped update, not unlimited builds.** New systems, migrations, full e-commerce rebuilds, or major campaigns are scoped as separate batched builds.
- **Existing platform, refreshed.** The update happens on your current platform (or an agreed equivalent) — not an open-ended custom rebuild.
- **Goal windows, not fixed deadlines.** Launch targets are steered toward; timelines shift with content readiness and access. Milestones gate the work, not calendar dates.
- **A defined cadence.** Onboarding session plus weekly check-ins during the support window — not open-ended on-demand availability.
- **Client provides timely access & assets.** Domain, logins, GBP access, confirmed hours, and real store + product photos (phone photos work — shot list provided at onboarding). Milestone clocks pause when access, assets, or sign-off is the blocker.
- **Tool fees + paid media are separate.** Subscriptions billed to client. Paid advertising is a distinct managed budget with its own scope.
